Sustainability Goals and Targets to Reduce Its Carbon Footprint

As a sustainability advocating player, below is our goal as an organization to reduce natural eco capital business carbon footprint.

- Reduce greenhouse gas emissions by 30% by 2025 specific year.
- Increase energy efficiency by implementing energy-saving technologies and practices.
- Transition to renewable energy sources such as solar or wind power.
- Encourage employees to use public transportation, carpool, or bike to work through incentives or infrastructure improvements.
- Implement waste reduction and recycling programs to minimize landfill waste.
- Optimize supply chain and logistics to reduce emissions from transportation.
- Promote telecommuting and remote work options to reduce commuting-related emissions.
- Conduct regular energy audits to identify areas of improvement and implement energy-saving measures.
- Invest in carbon offset projects to neutralize unavoidable emissions.
- Educate employees and stakeholders about the importance of sustainability and encourage behavior change.
- Engage in partnerships or collaborations with other organizations to share best practices and collectively reduce carbon footprint.
- Monitor and report progress towards carbon reduction goals regularly to hold the organization accountable and track improvements over time.

Sustainability reporting mechanism to stakeholders including shareholders, employees, and the public

The United Nations Global Compact (UNGC) is one of the channels through which our sustainability report is being communicated to stakeholders. This also requires us to upload the document on the company’s website for global reach.

Latest Date of Policy Review: October 2023
